

WHEN OXYGEN ISN'T ENOUGH...

WEDNESDAY 15 OCTOBER, 7PM – 8PM

TONI JOHNSTON

NP Dunedin ICU

The purpose of this webinar is to examine a patient's respiratory deterioration and escalation in treatment, beginning at ward level, and journeying to ICU. Topics covered will include recognising deterioration, bedside nursing interventions, and escalating respiratory-based therapies (both non-invasive & invasive).

Toni is a highly skilled career professional with over 30 years' experience in nursing within hospital environments, and over 35 years' experience as a pre-hospital emergency care provider in primary care environments (Order of St John). Toni currently is a member of the Southern Critical Care Flight team – flying to retrieve acutely unwell patients as part of a Nurse Practitioner/flight nurse or NP/flight paramedic team on both rotary & fixed wing aircraft, and participating in nurse-directed interhospital transfers. Toni is currently the only NP working inside an ICU within NZ, and is part of the RMO clinical roster responsible for triaging referrals & attending in-hospital patient emergencies.
