

Debbie Handisides.

I am nominating to remain on the Enrolled Nurses National Committee to contribute a strong, practical EN perspective to national discussions shaping the future of our profession in Aotearoa.

I am committed to engaging with health stakeholders, developing informed submissions on health policy, and monitoring legislation affecting enrolled nurses. Also clearly articulating the barriers faced by Enrolled Nurses across the diverse practice settings with all stake holders and any forums in the health settings. To promote the value enrolled nurses, have in the health system.

My goal is to advocate for sustainable, inclusive solutions that strengthen the EN workforce and improve the future EN workforce career paths.

I am committed to being an engaged, involved and active committee member. I have been on the committee for two years and would like to stay on for the next two years to complete my term and continue to work with the committee for the workforce planning that includes ENS in all health workplaces, and to shape an equitable future for enrolled nurses.
