

Website Manager Report for IPCNC AGM 2026

The IPCNC website - www.infectioncontrol.co.nz - is an excellent resource for members and remains a key asset for the College.

During the previous 18 months, a significant amount of work has gone into the website to improve the content for both members and non-members.

Many of the pages (tabs along the top) are now accessible to all who visit the site and their content has been improved and enhanced. Pages that have been substantially worked on include the following:

- Home and About Us
- Regional pages
- Events
- Professional Development
 - o Education
 - o Fundamentals of IPC
 - o IPC Funding and Awards
 - o Resources and links
- The members' library has been improved to be able to access documents and forms easily.

Members are still required to login into the Library to access certain College documents, including application forms, the Infection Controlla newsletter, important core College documents such as the NZNO IPCNC Rules and documents relating to committee work taken on your behalf e.g. meeting minutes, external reports etc.

The discussion forum is very much under-utilized. Next year we will look at this function and why it is not being used by members.

Website traffic remains good with higher activity when events or our national conference is being promoted.

There have been no changes to our external technical support or hosting platforms.

We welcome any feedback that can help us improve your experience when visiting the website.
